TITLE OF INVENTION: Detection of single nucleotide polymorhphisms [SNPs] and cytosine
TITLE OF INVENTION: methylations
FILE REFERENCE: E01/1193/WO
CURRENT APPLICATION WUMBER: US/10/257,017B
CURRENT FILING DATE: 2002-10-07
PRIOR APPLICATION NUMBER: DE 10019173.8
PRIOR FILING DATE: 2000-04-07
NUMBER OF SEQ ID NOS: 382046
SEQ ID NO 151882
LENGTH: 13
                                                                                                                                                                                                                                                                                                ô
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ö

GENERAL INFORMATION:
APPLICANT: Alexander Olek
APPLICANT: Christian Piepenbrock
APPLICANT: Christian Piepenbrock
APPLICANT: Kurt Berlin
TITLE OF INVENTION: Detection of single nucleotide polymorhphisms [SNPs] and cytosine
TITLE OF INVENTION: methylations
FILE REFERENCE: E01/1193/WO
CURRENT APPLICATION NUMBER: US/10/257,017B
CURRENT PILLING DATE: 2002-10-07
PRIOR PILLING DATE: 2000-04-07

TITLE OF INVENTION: Detection of single nucleotide polymorhphisms [SNPs] and cytosine
TITLE OF INVENTION: methylations
FILE REPERENCE: E01/1193/WO
CURRENT APPLICATION NUMBER: US/10/257,017B
CURRENT FILING DATE: 2002-10-07
PRIOR FILING DATE: 2000-04-07
NUMBER OF SEQ ID NOS: 382046
FERNING 353427
                                                TYPE: DNA
ORGANISM: Artificial Sequence
FEATURE:
COTHER INFORMATION: Oligonucleotide primer for the detection of SNP TSC0043880
US-10-257-017B-345115
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ; OTHER INFORMATION: Oligonuclectide primer for the detection of SNP TSC0045258

i Sequence 288484, Application US/10257017B

i GENERAL INFORMATION:

APPLICANT: Alexander Olek

APPLICANT: Christian Piepenbrock

APPLICANT: Christian Piepenbrock

TITLE OF INVENTION: methylations

TITLE OF INVENTION: methylations

FILE REFERENCE: E01/1193/NO

CURRENT APPLICATION NUMBER: US/10/257,017B

CURRENT APPLICATION NUMBER: DE 10019173.8

PRIOR FILING DATE: 2002-10-07

PRIOR FILING DATE: 2000-64-07

NUMBER OF SEQ ID NOS: 382046

SEQ ID NO 288484
                                                                                                                                                                                                                                                                                                                                                                   US-10-257-017B-285252

Sequence 285252, Application US/10257017B

Sequence 285252, Application US/10257017B

GENERAL INPORMATION:

Sequence 283-65, Application US/10257017B

Sequence 283-65, Application US/10257017B

GENERAL INFORMATION:
APPLICANT: Alexander Olek
APPLICANT: Christian Piepenbrock
APPLICANT: More Beaction of single nucleotide polymorhphisms (SNPs) and cytosine
TITLE OF INVENTION: methylations
TITLE OF INVENTION: methylations
TITLE OF INVENTION: E01/1937-W0
CURRENT FILING DATE: 2002-10-07
PRIOR PAPLICATION NUMBER: DE 10019173.8
PRIOR PILING DATE: 2000-04-07
NUMBER OF SEQ ID NOS: 382046

SEQ ID NOS: 382046

Sequence 216234, Application US/10257017B

APPLICANT: Alexander Olek

APPLICANT: Christian Piepenbrock

APPLICANT: Kurt Berlin

TILLS OF INVENTION: Detection of single nucleotide polymorhphisms [SNPs] and cytosin: TILLS OF INVENTION: methylations

FILE REFERENCE: E01/1193/WO

CURRENT PAPLICATION NUMBER: US/10/257,017B

CURRENT FILING DATE: 2002-10-07

PRIOR APPLICATION NUMBER: DE 10019173.8

PRIOR FILING DATE: 2000-04-07

NUMBER OF SEQ ID NOS: 382046

US-10-257-017B-151702/ Application US/10257017B
Sequence 151702, Application US/10257017B
GENERAL INFORMATION:
APPLICANT: Abrander Olek
APPLICANT: Christian Piepenbrock
APPLICANT: Christian Detection of single nucleotide polymorhphisms [SNP8] and cytosine
TITLE OF INVENTION: Detection of single nucleotide polymorhphisms [SNP8] and cytosine
FILE REFERENCE: E01/1193/WO
CURRENT APPLICATION NUMBER: US/10/257,017B
CURRENT FILING DATE: 2002-10-07
PRIOR APPLICATION NUMBER: DE 10019173.8
PRIOR APPLICATION NUMBER: DE 10019173.8
PRIOR FILING DATE: 2000-04-07
NUMBER OF SEQ ID NOS: 382046
SEQ ID NO 151702
LENGTH: 13

Sequence 136992, Application US/10257017B

Sequence 136992, Application US/10257017B

GENERAL INFORMATION:

APPLICANT: Alexander Olek

APPLICANT: Christian Piepenbrock

APPLICANT: Christian Piepenbrock

TITLE OF INVENTION: Detection of single nucleotide polymorhphisms [SNPs] and cytosir

TITLE OF INVENTION: methylations

TILE REFERENCE: E01/1193/WO

CURRENT APPLICATION NUMBER: DE 10019173.8

PRIOR APPLICATION NUMBER: DE 10019173.8

PRIOR PILING DATE: 2000-04-07

NUMBER OF SEQ ID NOS: 382046

SEQ ID NO 136992

LENGTR: 13

GENERAL INFORMATION:
APPLICANT: Alexander Olek
APPLICANT: Christian Piepenbrock
APPLICANT: Kurt Berlin
TITLE OF INVENTION: Detection of single nucleotide polymorhphisms [SNPs] and cytosine
TITLE OF INVENTION: methylations
FILE REPERENCE: E01/1193/W0
CURRENT APPLICATION NUMBER: US/10/257,017B
CURRENT APPLICATION NUMBER: US 1002-10-07
PRIOR FILING DATE: 2002-10-07
PRIOR FILING DATE: 2000-04-07
